

Research Poster Guidelines

Nov 25

Fall 2025

Required Class Documentation

- A finalized poster file in PPTX for Research Day in April, 2025
- Sample poster files:
 - <https://www.robofest.net/cj/StopSignDetection.pdf>
 - <https://www.robofest.net/cj/LLMchatBot2.pdf>
- Additional requirements. Add math notations as much as possible.

- Poster_template3.pptx on Canvas / Modules / Term Project

3

Suggested Sections

- (catchy) Title, Authors, Affiliations
- **Abstract** (including summary of main findings; short; for general audience)
- **Introduction:** problem statement, motivation (why matters), background, prior work with some references
- **Research Goals (Objectives):** Research questions or hypothesis. Specific aims of your project
- **Methods (Methodologies)**
 - Design / Model Architecture / Algorithms
Variables / Parameters
 - Data sources / Data sets / sample images
 - Train process
 - Evolutionary optimization processes
 - ...
- **Results:** Quantitative Results: Metrics like accuracy, precision, etc. Visualizations: Graphs, tables, confusion matrix, and feature maps, etc.
- **Discussion:** interpretation of results and comparison with baselines. Summary of main findings; Implications; Highlight advantages; acknowledge limitations; Conclusion (Key takeaways from the research). Future work
- **Acknowledgements** — People to recognize; Funding; Conflict of interest
- **Data & Code sharing**
- **References**

Important Notes

- Math notations
- Figures (images, graphs, plots)
- Comparison Tables
